

PRADYUMNAN R

Application Engineer | Java Backend & Enterprise Application Developer

+91 73058 79280 | pradyumnansetlur7@gmail.com | Chennai, Tamil Nadu, India | www.linkedin.com/in/pradyumnan-raghavan

PROFESSIONAL SUMMARY

Results-driven Application Engineer at Newgen Software Technologies with ~2 years of hands-on experience building and supporting enterprise-grade Java applications across Banking, Financial Services, and Document Management domains. Proven track record of delivering REST API integrations, SQL-optimized backend services, and production-grade utilities for marquee clients including NaBFID and DKSH. Currently pursuing M.Tech in AI & ML at BITS Pilani (WILP) to build toward AI/ML-augmented enterprise solutions. Targeting Java Backend or Software Engineer roles where deep domain expertise in ECM, DMS, iBPS and enterprise integrations creates immediate value.

CORE COMPETENCIES

Java Enterprise Development	REST API Design & Integration	Document Management Systems	SQL Query Optimization & JDBC
ECM / Workflow Automation	SAP & Salesforce Integration	Webservice Development and Integrations	Requirement Analysis & Solution Design

TECHNICAL SKILLS

Programming Languages	Java (Primary), SQL, JSP, HTML, CSS, JavaScript, VB.NET, Python
Backend Technologies	REST APIs, JSON, XML, JDBC, Servlet/JSP
Databases	MS SQL Server, PostgreSQL, Oracle
Enterprise Platforms	Newgen OmniDocs, OmniScan, NewgenONE, SAP Integration, Salesforce Integration, iBPS - CLOS
Application Servers	JBoss EAP
Currently Learning	Spring Boot, Spring Data JPA, Hibernate, Maven, Git/GitHub, Docker, Advanced Java
Tools & IDEs	Eclipse, Netbeans, Visual Studio, Postman, Maven (learning), Git (learning), Docker (learning)
Operating Systems	Windows, Linux

PROFESSIONAL EXPERIENCE

Application Engineer | Newgen Software Technologies Ltd

Jun 2024 – Present

Newgen Software Technologies — NSE/BSE-listed global ECM & BPM product company. Delivered Java-based customizations, API integrations, and production support across Banking & Financial Services clients.

- Developed and deployed Java-based REST API endpoints for enterprise document management, reducing manual processing effort for clients by streamlining document upload, search, and retrieval workflows.
- Implemented Change Requests (CRs) and feature enhancements across multiple client projects, consistently meeting delivery timelines.
- Performed Root Cause Analysis (RCA) on production issues, authored detailed incident reports, and resolved critical bugs to maintain SLA commitments.
- Designed and optimized SQL queries across MS SQL Server, PostgreSQL, and Oracle, improving query performance and data retrieval accuracy.
- Integrated third-party enterprise platforms (SAP, Salesforce) with Newgen OmniDocs via REST/SOAP APIs, enabling seamless cross-platform document and metadata exchange.
- Developed Java batch processing utilities with SFTP support, handling high-volume document ingestion and processing pipelines.
- Implemented token-based security (JWT validation) and security hardening for portal APIs across banking-domain projects.
- Conducted client interaction, requirement analysis, and technical discussions to translate business needs into implementable technical solutions.
- Supported application deployments on JBoss EAP and provided go-live production support for enterprise rollouts.

KEY PROJECTS

NaBFID — National Bank for Financing Infrastructure and Development — *Java, JSP, Servlet, PostgreSQL, OmniDocs*

- Built a Circular Portal with document upload, search, and retrieval capabilities using REST APIs integrated with Newgen OmniDocs.
- Implemented token-based validation and security improvements to protect API endpoints in a banking-compliance environment.
- Optimized SQL queries to improve search response times and ensure audit-compliant data access patterns.

DKSH — Multi-Country Document Processing Utility — *Java, OmniScan, SFTP, Batch Processing, Multi-Threading, MS SQL Server*

- Developed and enhanced OmniScan-based batch processing utilities for multi-country document ingestion via SFTP.
- Performed memory and performance optimization on Java utilities handling large document volumes, reducing processing time.
- Extended utility to support additional country configurations, improving reusability and maintainability.

BRIGADE — SAP Integration — Document Archival Pipeline — *Java, SAP APIs, OmniDocs, REST, PostgreSQL*

- Built a SAP-to-OmniDocs document upload pipeline with metadata mapping and folder hierarchy creation.
- Developed document retrieval APIs enabling SAP users to access archived documents stored in OmniDocs.
- Provided production support and resolved integration issues, ensuring 99%+ uptime for the document archival workflow.

BRIGADE — Salesforce Integration — Document Management Service — *Java, Salesforce REST APIs, PostgreSQL, JWT, OmniDocs*

- Developed a Salesforce-integrated document upload utility connecting Salesforce CRM with Newgen OmniDocs for centralized document storage.
- Implemented JWT-based authentication for secure Salesforce API communication.
- Managed metadata mapping and document lifecycle workflows in PostgreSQL and OmniDocs.

EDUCATION

M.Tech — Artificial Intelligence & Machine Learning 2026 – Present (Expected 2027)

BITS Pilani — Work Integrated Learning Programme (WILP) | 1st Semester Completed

B.E. — Electronics & Communication Engineering 2020 – 2024

Meenakshi Sundararajan Engineering College, Chennai | CGPA: 8.4 / 10

Higher Secondary Education 2019 – 2020

Kendriya Vidyalaya Ashok Nagar, Chennai | 91.0 % (CBSE)

Secondary Education 2017 – 2018

Kendriya Vidyalaya Ashok Nagar, Chennai | 83.8 % (CBSE)

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Java Spring Framework, Spring Boot & Spring AI for GenAI — Udemy (In Progress, 2026)
- The Complete Java Development Bootcamp — Udemy (Completed)
- SQL for Beginners: MySQL & Database Design — Udemy (Completed)
- Microsoft 365 Copilot – Prompt Engineering & AI Productivity (Microsoft Learn)

Currently Learning (Self-Directed):

- Spring Boot, Spring Data JPA, Hibernate — REST API development with modern Java stack
- Maven, Git/GitHub — Build automation and version control workflows
- Docker — Containerization fundamentals for enterprise deployment pipelines
- Advanced SQL — Query optimization, indexing strategies, execution plans

INTERNSHIPS

- Embedded Systems with IOT – National Small Industries Corporation
- Application Engineer Training and iBPS CLOS Accelerator - Newgen Software Technologies Ltd
